

# Choosing the Milk Delivery Service that's right for your school

**You may want to contact more than one milk distributor, so you can find the right fit for your school, based on service, product and price.**

Here's a list of questions you can ask to help you find the right milk delivery service:

Do you offer a choice of various types of white or chocolate milk?

Do you deliver and transfer the milk directly into the school's refrigerator or is someone from the school responsible for ensuring the milk is transferred to the refrigerator upon delivery?

Do you rotate milk each delivery (first in first out to ensure freshness of milk)?

Will you withdraw milk past its best-before date?

Can you work from pre-agreed (standing) orders so milk orders do not have to be placed each week?

Will you replace spoiled milk?

What is the price of milk? How will you invoice?

How often do you deliver?

Do you use a refrigerated truck to deliver milk, ensure freshness and prevent spoilage?
